UNITED STATES DISTRICT COURT
WESTERN DISTRICT OF WASHINGTON

10 KATHERINE MOUSSOURIS, HOLLY
11 MUENCHOW, and DANA PIERMARINI,
12 on behalf of themselves and a class of
those similarly situated,

13 Plaintiffs,

14 v.
15 MICROSOFT CORPORATION
16 Defendant.

Case No. 15 cv 1483 (JLR)

**SECOND AMENDED CLASS ACTION
COMPLAINT**

(Trial by Jury Demanded)

17 Plaintiffs Katherine Moussouris, Holly Muenchow, and Dana Piermarini (“Plaintiffs”), on
18 behalf of themselves and all others similarly situated, allege as follows:

SUMMARY OF CLAIMS

20 1. Plaintiffs bring this action alleging violations of Title VII of the Civil Rights Act
21 of 1964, 72 U.S.C. §§ 2000e *et seq.* (“Title VII”), and the Washington Law Against
22 Discrimination, Rev. Code Wash. § 49.60.010. *et seq.*, to challenge Microsoft Corporation’s
23 (“Microsoft”) continuing policy, pattern, and practice of sex discrimination against female
24 employees in technical and engineering roles, including technical sales and services positions
25 (“female technical employees”) with respect to performance evaluations, pay, promotions, and
26 other terms and conditions of employment. Microsoft has implemented these policies and
27 practices despite knowing that they have a longstanding disparate impact on female technical

28

1 employees. Microsoft also retaliates against female technical employees who complain about this
2 discrimination.

3 2. Microsoft is a global provider of software and software-related services as well as
4 hardware devices. In 2015, Microsoft generated \$93.6 billion dollars in net revenue and \$12.2
5 billion dollars in net income. Microsoft is a major employer, with a headcount of approximately
6 118,000 full-time employees in 2015, many of whom are technical employees.

7 3. As a result of Microsoft’s policies, patterns, and practices, female technical
8 employees receive less compensation and are promoted less frequently than their male
9 counterparts. Microsoft’s company-wide policies and practices systematically violate female
10 technical employees’ rights and result in the unchecked gender bias that pervades its corporate
11 culture. The disadvantage to female technical employees in pay and promotion is not isolated or
12 exceptional, but rather the regular and predictable result of Microsoft’s policies and practices and
13 lack of proper accountability measures to ensure fairness.

14 4. In addition to bringing this action on behalf of themselves, Plaintiffs also bring this
15 action on behalf of a class of similarly situated current and former female technical employees
16 employed by Microsoft in the United States (the “Class”), in order to end Microsoft’s
17 discriminatory policies and practices and to make the Class whole.

THE PARTIES

Plaintiff Katherine Moussouris

20 5. Plaintiff Katherine Moussouris is a woman who lives in Kirkland, Washington.
21 She is a citizen of the United States.

22 6. Ms. Moussouris was employed by Microsoft from approximately April 2007 to
23 May 30, 2014 in Redmond, Washington.

Plaintiff Holly Muenchow

25 7. Plaintiff Holly Muenchow is a woman who lives in Woodinville, Washington.
26 She is a citizen of the United States.

27 8. Ms. Muenchow has been employed by Microsoft since approximately September
28 2002 in Redmond, Washington.

1 **Plaintiff Dana Piermarini**

2 9. Plaintiff Dana Piermarini is a woman who lives in Leesburg, Virginia. She is a
3 citizen of the United States.

4 10. Ms. Piermarini has been employed by Microsoft since approximately September
5 2006.

6 **Defendant**

7 11. Defendant Microsoft is a corporation formed under the laws of the State of
8 Washington with its corporate headquarters within the city of Redmond, King County, at One
9 Microsoft Way, Redmond, Washington 98052-7329.

10 12. Upon information and belief, Microsoft's headquarters in the State of Washington
11 maintains control, oversight, and direction over the operation of its facilities, including its
12 employment practices.

13 13. During all relevant times, Microsoft was Plaintiffs' employer within the meaning
14 of all applicable statutes.

15 14. At all times pertinent hereto, Microsoft has employed more than five hundred
16 people.

17 **JURISDICTION AND VENUE**

18 15. This Court has original subject matter jurisdiction over Title VII claims pursuant
19 to 28 U.S.C. § 1331 and 1343 and 42 U.S.C. § 2000e-5(f)(3), because they arise under the laws of
20 the United States and are brought to recover damages for deprivation of equal rights.

21 16. This Court has jurisdiction over the Washington Law Against Discrimination
22 claims under the Class Action Fairness Act, 28 U.S.C. § 1332(d), because this is a class action in
23 which: (a) there are 100 or more members in the proposed class; (b) at least some members of the
24 proposed class have a different citizenship from Defendant; and (c) the claims of the proposed
25 class members exceed \$5,000,000 in the aggregate.

26 17. In addition, this Court has supplemental jurisdiction over the Washington Law
27 Against Discrimination claims because they arise from a common nucleus of operative facts with
28

1 the federal claims and are so related to the federal claims as to form part of the same case or
2 controversy under Article III of the United States Constitution.

3 18. Venue is proper in this judicial district under 28 U.S.C. § 1331(b)-(c) and 42
4 U.S.C. § 2000e-5(f)(3), because Microsoft maintains offices in this district, conducts business in
5 this district, and a substantial part of the events and omissions giving rise to the claims alleged
6 herein occurred in this district, and because the alleged unlawful employment practices were
7 committed here, and employment records relevant to those practices are maintained and
8 administered here.

9 19. The Western District of Washington has personal jurisdiction over Microsoft
10 because it maintains offices in this District, does business in Washington and in this district, and
11 because many of the acts complained of and giving rise to the claims alleged herein occurred in
12 Washington and in this District.

13 20. Plaintiffs have exhausted their administrative remedies and complied with all
14 statutory prerequisites to their Title VII claims. Plaintiff Katherine Moussouris filed a charge of
15 gender discrimination and retaliation individually and on behalf of all similarly situated female
16 technical employees employed by Microsoft with the Equal Employment Opportunity
17 Commission (“EEOC”) on May 14, 2014. The EEOC charge is attached as Exhibit A (and
18 incorporated herein). By notice dated June 29, 2015, the EEOC issued a Notice of Right to Sue.
19 The original complaint in this action was filed within ninety days of the Notice of Right to Sue.
20 Where applicable, under the Ninth Circuit’s application of the single-filing rule, Muenchow is not
21 required to have filed a separate charge of gender discrimination and retaliation with the EEOC,
22 but instead may piggy-back off the previous filing of Moussouris, because Moussouris’s EEOC
23 charge relates to the same claims that Muenchow asserts.

24 21. Where applicable, under the Ninth Circuit’s application of the single-filing rule,
25 Piermarini is not required to have filed a separate charge of gender discrimination and retaliation
26 with the EEOC, but instead may piggy-back off the previous filing of Moussouris, because
27 Moussouris’s EEOC charge relates to the same claims that Piermarini asserts.

28

FACTUAL ALLEGATIONS

22. Microsoft maintains uniform employment, compensation, performance review, and promotion policies throughout the United States. Microsoft also cultivates and promotes a common corporate culture. These policies and this culture originate in Microsoft's headquarters in the State of Washington, and are disseminated to its offices in the rest of the country.

23. Microsoft's offices throughout the U.S. use a common organizational structure, organizing technical employees by levels.

24. In positions that Microsoft categorizes as “Tech” in nature, only 16.9% of employees are female, while 83% are male.¹

25. Microsoft discriminates against female technical employees in (1) performance evaluations; (2) compensation; and (3) promotions.

Performance Evaluations

26. Microsoft uses uniform, unvalidated, and unreliable procedures for evaluating employee performance that systematically undervalue female technical employees relative to their similarly situated male peers. This has been true throughout the class period, although Microsoft changed some aspects of its performance review system in 2013.

2011-2013 – “Stack Ranking”

27. For many years and continuing through 2013, Microsoft used a companywide “stack ranking” system for evaluating employee performance, which force ranked employees from best to worst using a performance rating from 1 through 5, with 1 being best, and 5 being worst. Only a certain percentage of employees in a defined peer group could be assigned a certain rank – for example, 20% of employees could receive a 1, 20% a 2, 45% a 3, 10% a 4, and the remaining 5% received a 5.

28. This process is an invalid performance measurement system, as it sets arbitrary cutoffs among performers with similar performance. The stack ranking process forces a

¹ See Our Workforce 2015: Tech, Microsoft Corporation, available at <https://www.microsoft.com/en-us/diversity/inside-microsoft/default.aspx#epgDivFocusArea> (last visited April 5, 2016); see also Request for Judicial Notice Ex. A, Dkt. 30-1.

1 distribution of performance ratings outcomes (from 1 through 5) regardless of whether there are
2 meaningful performance differences between individual employees within a particular peer
3 group.

4 29. Worse still, an employee's rank was not based on valid and reliable performance
5 measures. Microsoft instructed managers to evaluate employees based on three criteria: 1) "the
6 What," which assessed their results against their "commitments"; 2) "the How," which assessed
7 how the results were accomplished as demonstrated through "competencies"; and 3) "Proven
8 Capability," which assessed whether the employees had a demonstrated history of taking on more
9 challenging work while continuing to deliver results. Microsoft did not instruct managers to
10 assign the three inputs any particular weight in undertaking this process. Microsoft also did not
11 ensure that managers were trained to assess these inputs in uniform and consistent ways to ensure
12 reliability. In fact, managers' assignment of employees' ranking relative to their peers was
13 untethered from any kind of valid performance metric that could be reliably compared from one
14 employee to another. The "How," for example, involves the questions, "Did the employee
15 effectively collaborate, exhibit judgment, and demonstrate adaptability?" and "What was the
16 impact the employee had on others' results through how the employee worked?" Microsoft
17 describes the "Proven Capability" metric as "a demonstrated history of taking on more
18 challenging work while continuing to deliver results," which is similarly unreliable and
19 susceptible to inconsistent and biased measurement. Managers were instructed to use the three
20 unreliable qualitative assessments of employees' performance (that is, "the What," "the How,"
21 and "Proven Capability") in assigning the employees in their review group a recommended
22 ranking from best to worst (1 through 5).

23 30. To gather information on employees in these three areas, Microsoft gave
24 employees the opportunity to nominate certain individuals to provide input on their performance.
25 Microsoft managers, however, had the ability to add or remove reviewers at their election.
26 Accordingly, they were able to influence the performance evaluation process by controlling
27 which individuals would ultimately provide feedback on a particular employee.

28

1 31. Technical employees were organized into peer groups to be rated against one
 2 another in a so-called “calibration meeting.” These meetings were attended by managers
 3 (“Calibration Managers”), who presented the merits of their own employees and attempted to
 4 discredit the merits of the other Calibration Managers’ employees. The Calibration Managers did
 5 not follow a reliable standard for ensuring consistency of review and comparison across
 6 performers. After a week of such meetings, the “Calibration Owner” (the manager of the
 7 Calibration Managers, typically a Director or Partner) would finally resolve the order of the stack
 8 for all employees discussed in a given meeting. Because of the lack of reliable metrics, an
 9 employee could end up on the bottom of the stack, regardless of her actual performance record
 10 and regardless of the rank her Manager originally recommended.

11 32. After conclusion of the calibration meetings, the results were rolled up as “ratings
 12 recommendations” to be reviewed and approved by the leadership of each organization within
 13 Microsoft, typically by a high-level manager, such as a Corporate Vice President and/or
 14 Executive Vice President. During this third-tier review, employees’ rankings could shift if the
 15 higher-level manager determined that the distribution needed to be adjusted.

16 33. This forced ranking process took place twice each year, with the mid-year stack
 17 ranking used as a mechanism to determine mid-year promotions, and the end of year stack
 18 ranking used for compensation and year-end promotion decisions.

19 34. In this system, female technical employees were systematically undervalued
 20 compared to their male peers because as a group they received, on average, lower rankings
 21 despite equal or better performance. Upon information and belief, female employees were most
 22 adversely impacted by the calibration meetings, where the vast majority (over 80%)² of attending
 23 managers were men. The proportion of men in management roles only increases at higher levels
 24 of the organization, including with each successive review of the ratings recommendations.

25
 26
 27

² See Our Workforce 2015: Leadership, Microsoft Corporation, *available at*
 https://www.microsoft.com/en-us/diversity/inside-microsoft/default.aspx (last visited April 5,
 2016).

1 35. Predictably, performance management systems that include unreliable and invalid
 2 criteria create inaccurate and biased outcomes. Social science research describes the reasons why
 3 such inaccurate performance measurements systematically disadvantage women, particularly
 4 where women work in male-dominated roles and where evaluators are men, as is frequently the
 5 case at Microsoft.³

6 36. Upon information and belief, Microsoft's stack ranking system has had an adverse
 7 impact upon female employees.

8 **2014-Present – “Connect” (or, stack ranking by a different name)**

9 37. In 2014, Microsoft implemented a similar stack ranking system called Connect to
 10 manage employee performance evaluation. This system is still in place today.

11 38. The Connect system is a similarly unvalidated and unreliable discriminatory
 12 performance evaluation procedure that systematically undervalues female technical employees
 13 relative to their male peers, and results in lower scores than men in similar positions despite equal
 14 or better performance.

15 39. Within Connect, managers rate their direct reports based upon the employees'
 16 "impact." Impact includes three factors: "key individual accomplishments that contribute to
 17 team, business, or customer impact"; "your contributions to the success of others"; and "your
 18 results that build on the work, ideas, or efforts of others." The Connect tool contains a horizontal
 19 bar with a marker that can slide from left (low impact) to right (high impact). Managers place the
 20 marker somewhere on the scale for each employee, and can also enter a brief justification for the
 21 impact assessment (1,000 characters or less). Managers are not trained to calibrate their ratings to
 22 a common understanding of performance across reviewers.

23
 24

³ See, e.g., Alice H. Eagly, Mona G. Makhijani and Bruce G. Klonsky, *Gender and the*
 25 *Evaluation of Leaders: A Meta-analysis*, 111 (1) *Psychological Bulletin* 3, 3-22 (Jan. 1992)
 26 (observing that devaluation of women's performance is greater when women leaders "occupied
 27 male-dominated roles and when the evaluators were men"); Karen S. Lyness and Madeline E.
 28 Heilman, *When Fit is Fundamental: Performance Evaluation and Promotions of Upper-level*
Female and Male Managers, 91 (4) *Journal of Applied Psychology* 777, 777-85 (2006)
 ("[N]egative expectations resulting from perceptions of lack of fit detrimentally affect how
 women are regarded and how their work is evaluated when they are in traditionally male jobs.").

1 40. Next, managers attend “People Discussions” with the other managers in their
 2 organization, and the managers’ leader. Managers discuss impact recommendations and who
 3 deserves the highest scores. The impact recommendations are then rolled-up to the leader, who
 4 can adjust where employees fall on the impact spectrum based on the leader’s perceptions of
 5 impact. Those results are then rolled up through the management chain, with each subsequent
 6 level of manager adjusting results, until the organization’s leader makes a final determination.

7 41. While different in form, this system functions much like stack ranking in
 8 substance, forcing a distribution of performance scores, with a similarly adverse impact on female
 9 technical employees, for the same reasons.

10 **Compensation**

11 42. Microsoft employs uniform, unvalidated, and unreliable procedures for
 12 determining employees’ compensation that disparately impact female professionals.

13 43. Microsoft determines employees’ compensation primarily by their performance
 14 review results. Because female technical employees systematically receive worse results, they
 15 also earn less than their male peers.

16 44. Under both the stack ranking and Connect performance review processes,
 17 compensation has been determined by performance rating and job level (e.g., 59, 60, 61, etc.).
 18 Class members’ compensation has included three components: salary, bonus, and stock awards.
 19 After each year-end review, class members are eligible for a merit increase to base salary, a
 20 “performance review bonus,” and “performance review stock awards.” Whether, and how much,
 21 an employee receives in any of these categories is determined by her performance rating and her
 22 job level.

23 45. For example, during the stack ranking era, employees ranked as 5’s received no
 24 merit increase, no bonus, and no stock awards. Employees ranked as 4’s were eligible for a
 25 bonus of between 5 to 15% of salary, depending on their level. Employees ranked as 3’s were
 26 eligible for a bonus of 10 to 30% of salary, depending on their level, and so forth. The same type
 27 of scale, defined by performance rank and job level, determined merit increases and stock awards.

1 46. Under the Connect process, an employee's placement on the "impact" scale
2 determines her merit increase, bonus, and stock awards. Based on the employee's job level, the
3 placement on the scale automatically correlates with a pre-determined rewards outcome that is
4 designed to make all allocations fit within the organization's overall targets. As an employee's
5 impact placement changes with each level of management review, so does the employee's
6 compensation outcome.

7 47. Because female technical employees have been systematically disadvantaged by
8 both the stack ranking and Connect processes, their compensation likewise has been adversely
9 impacted.

10 **Promotions**

11 48. Microsoft also employs common, unvalidated, unreliable, and discriminatory
12 procedures for selecting employees for promotion. Because promotions are tied to the
13 performance review process, female technical employees are adversely impacted in promotions as
14 well.

15 49. Microsoft does not apply legitimate or objective criteria for promotions of
16 technical employees. Promotions are not determined by objective, valid, and/or reliable
17 performance measures. Instead, employee promotions are tap-on-the-shoulder.

18 50. Under the stack ranking process, promotions were discussed at the end of the
19 calibration meeting process. Depending on where employees ended up in the overall rank, their
20 Calibration Managers could identify them as eligible for promotion (or not), while also arguing
21 for or against promotions for other managers' reports. Promotion recommendations stemming
22 from calibration meetings were then rolled up to organizational leadership for final determination.

23 51. Under the Connect process, when managers place their reports on the impact
24 scale, they are also required to check either a "yes" or a "no" button for promotion. Managers
25 may submit a brief justification for the recommendation (1,000 character limit). The
26 recommendations are discussed during the "People Discussions," and then submitted and rolled
27 up through the manager's reporting chain for review, along with the overall impact rating. Each
28 subsequent management level reviews and adjusts promotions decisions along with

1 impact/compensation outcomes. Ultimately, as with performance and compensation, final
2 promotion decisions are made by the organization leader.

3 52. Overall, Microsoft promotes an overwhelmingly disproportionate number of men,
4 and passes over equally or more qualified women.

CLASS ACTION ALLEGATIONS

6 53. Plaintiffs Moussouris, Muenchow, and Piermarini bring this class action pursuant
7 to Federal Rules of Civil Procedure 23(a), (b)(2), and (c)(4) seeking liability-phase injunctive and
8 declaratory relief on behalf of a nationwide Class of all female technical employees employed by
9 Microsoft in the United States at any time from July 18, 2013 through the resolution of this action
10 for claims under Title VII, and for the period from May 14, 2011 through resolution of this action
11 for claims under the Washington Law Against Discrimination. Plaintiff also brings this class
12 action pursuant to Federal Rules of Civil Procedure 23(a) and (b)(3) seeking backpay, monetary
13 damages, and other make-whole relief on behalf of a nationwide Class of all female technical
14 employees employed by Microsoft in the United States at any time from July 18, 2013 through
15 the resolution of this action for claims under Title VII, and for the period from May 14, 2011
16 through resolution of this action for claims under the Washington Law Against Discrimination.
17 Excluded from the Class are retail store employees and employees in Microsoft's Legal, Finance
18 and Human Resources departments. Plaintiffs reserve the right to amend the definition of the
19 Class based on discovery or legal developments.

20 ||| 54. Plaintiffs are members of the Class they seek to represent.

21 55. The members of the Class identified herein are so numerous that joinder of all
22 members is impracticable. Microsoft had a headcount of approximately 118,000 full-time
23 employees in 2015. Although Plaintiffs do not know the precise number of female technical
24 employees at Microsoft, nationwide or in Washington, the number is far greater than can be
25 feasibly addressed through joinder.

26 56. There are questions of law and fact common to the Class, and these questions
27 predominate over any questions affecting only individual members. Common questions include:

11 f. whether Microsoft has failed to implement policies and procedures to
12 prevent retaliation against employees who challenge gender discrimination in the workplace, has
13 failed to address complaints of gender discrimination in the workplace, and has failed to conduct
14 proper investigations of the same; and

15 g. whether equitable remedies, injunctive relief, compensatory damages, and
16 punitive damages for the Class are warranted.

17 ||| 57. Plaintiffs' claims are typical of the claims of the Class they seek to represent.

18 58. Plaintiffs will fairly and adequately represent and protect the interests of the Class
19 they seek to represent.

20 59. Plaintiffs have retained counsel competent and experienced in complex class
21 actions and employment discrimination litigation.

22 60. Class certification is appropriate as to each Class pursuant to Federal Rule of Civil
23 Procedure 23(b)(2) because Microsoft has acted and/or refused to act on grounds generally
24 applicable to the Class, making appropriate declaratory and injunctive relief with respect to
25 Plaintiffs and the Class they seek to represent. The Class Members in each Class are entitled to
26 injunctive relief to end Microsoft's common, uniform, unfair, and discriminatory policies and
27 practices.

1 61. Class certification is also appropriate as to each Class pursuant to Federal Rule of
2 Civil Procedure 23(b)(3) because for each Class, common questions of fact and law predominate
3 over any questions affecting only individual members of that Class, and because for each Class, a
4 class action is superior to other available methods for the fair and efficient adjudication of this
5 litigation. The Class Members in each Class have been damaged and are entitled to recovery as a
6 result of Microsoft's common, unfair, and discriminatory policies and practices. Microsoft has
7 computerized account data, payroll data, and personnel data that will make calculation of
8 damages for specific Class Members in each Class relatively simple. The propriety and amount of
9 punitive damages are based on Microsoft's common conduct, making these issues common to
10 each Class.

CLAIMS OF NAMED PLAINTIFFS

Plaintiff Katherine Moussouris

13 62. Plaintiff Moussouris was hired by Microsoft in April of 2007 as a Security
14 Program Manager in the Trustworthy Computing Group. During her tenure at Microsoft, Ms.
15 Moussouris consistently achieved and usually exceeded her performance goals, and made
16 significant contributions to Microsoft's business. Yet, as a result of Microsoft's forced ranking
17 process, Ms. Moussouris received lower performance ratings than her male peers, despite having
18 better performance during the same performance period.

19 63. For example, in May 2012, Ms. Moussouris's manager told her that she had
20 outstanding performance and had earned a rating of 2. However, after the forced ranking process,
21 she instead received a 3.

22 64. Similarly, in May 2013, Ms. Moussouris's manager again commended her
23 performance and told her she deserved a 1. After the forced ranking process, Ms. Moussouris
24 received a 2.

25 65. Microsoft also paid Ms. Moussouris less than her male peers throughout her tenure
26 at the company.

1 66. Microsoft also discriminated against Ms. Moussouris in its promotion process.
2 From 2010 to 2014, Microsoft passed her over for promotions in favor of less qualified and less
3 experienced men.

4 67. For example, in 2012, while Ms. Moussouris was on maternity leave, she was not
5 put forward for a promotion to Level 65, Principal Security Strategist, for which she was eligible
6 and eminently well qualified. In the year prior, Ms. Moussouris had been responsible for an
7 industry-leading initiative that resulted in the highest-rated news announcement for the Microsoft
8 Trustworthy Computing Group. However, Microsoft instead selected Ms. Moussouris's male
9 colleague, who was less qualified, to be her manager. Ms. Moussouris's managers from 2011
10 through 2013 told her that although the impact, quality, and scope of her work had been
11 "Principal-level" for years, certain managers did not like her manner or style, and so Microsoft
12 did not promote her. Ms. Moussouris was subject to an invalid and gender biased selection
13 process.

14 68. In 2013, Ms. Moussouris was again passed over for promotion to Level 65, despite
15 newsworthy new initiatives she created that are still referred to in the security industry. Instead,
16 Microsoft promoted two less qualified men in the Trustworthy Computing Group, who had not
17 performed the same scope of work as Ms. Moussouris, nor obtained the same level of recognition
18 and accomplishment in the security industry.

19 69. Ms. Moussouris also saw other female technical employees passed over for
20 promotion in favor of less-qualified men. For example, when the director of the Trustworthy
21 Computing Group left, two Principal-level women who had worked for him were not even
22 considered or given the chance to interview for the role. Instead, Microsoft hired a less-qualified
23 male from outside the company with little to no relevant work experience in managing the
24 specifics of large scale security response in a company with the size and scope of Microsoft.

25 70. In 2008, Ms. Moussouris complained about the Director of the Trustworthy
26 Computing Group, who was sexually harassing other women in the Group. Microsoft
27 investigated and concluded that he had in fact been sexually harassing female employees. Yet
28 Microsoft's response was to re-assign this male Director to another part of the Trustworthy

1 Computing Group, while retaining his title and influence. Before he was transferred, however, he
 2 retaliated against Ms. Moussouris by assigning her a low bonus. Ms. Moussouris complained
 3 about retaliation, but Microsoft took no action. Since that time, the same Director has been
 4 promoted to Senior Director.

5 71. Starting in 2013, Ms. Moussouris's manager systematically undermined Ms.
 6 Moussouris by reducing the scope of her role, even though her high performance never changed.
 7 For example, he took away several of Ms. Moussouris's responsibilities and re-assigned them to a
 8 less-qualified and less-experienced man, two levels below Ms. Moussouris. He also began to
 9 assign Ms. Moussouris low-level tasks that he never asked men at Ms. Moussouris's level to do.
 10 Ms. Moussouris complained about this unfair treatment, but Microsoft took no action.

11 72. Due to the nature and extent of the unfair treatment Ms. Moussouris received, and
 12 Microsoft's continued refusal to take any corrective action to address it, Plaintiff was forced to
 13 resign on May 30, 2014.

14 **Plaintiff Holly Muenchow**

15 73. Plaintiff Muenchow was hired by Microsoft in September of 2002 as a Software
 16 Test Engineer (STE), and was then promoted to I/T Operations ["I/T OPS"] Program Manager in
 17 approximately 2007. In 2012, Ms. Muenchow became a Senior I/T OPS Program Manager, an
 18 engineering role where she coordinates product releases to Microsoft clients.

19 74. During the Class period, Ms. Muenchow has been subjected to Microsoft's
 20 company performance review process, receiving reviews that have not fully recognized her
 21 contributions and which have negatively affected her compensation.

22 75. In addition, despite her long tenure with Microsoft, Ms. Muenchow has progressed
 23 only from a Level 58 to a Level 63. By contrast, male colleagues have been promoted to higher
 24 levels for which she was qualified and not considered. Ms. Muenchow has observed that women
 25 progress more slowly at the company.

26 76. As a result of Microsoft's compensation and promotion process, Ms. Muenchow
 27 has been paid less than comparable male coworkers in the same position.

1 77. Ms. Muenchow believes that Microsoft also disfavors women who take maternity
 2 or medical leave, even if it has no impact on their ability to do their job when they are not on
 3 leave, thus preventing them from earning top review scores, compensation, or promotions.

4 **Plaintiff Dana Piermarini**

5 78. Plaintiff Piermarini was hired by Microsoft in September of 2006 as a Solutions
 6 Specialist in the Sales Division. Ms. Piermarini has a bachelor's degree in Information Systems
 7 with a minor in Computer Science. In her role as a Solutions Specialist, Ms. Piermarini educates
 8 customers on technical aspects of Microsoft products.

9 79. During her tenure at Microsoft, Ms. Piermarini has consistently achieved and
 10 usually exceeded her performance goals, and made significant contributions to Microsoft's
 11 business.

12 80. Despite her strong work performance, Ms. Piermarini has progressed only from a
 13 Level 62 to a Level 64 over the course of 9 years. By contrast, male colleagues in comparable
 14 positions have been promoted at faster rates.

15 81. For example, after returning from maternity leave in 2010 Microsoft denied Ms.
 16 Piermarini a promotion from a Level 63 to a Level 64 despite her performance record.
 17 Conversely, a male member of her team who was not a top performer received a mid-year 2010
 18 promotion.

19 82. Microsoft eventually promoted Ms. Piermarini to a Level 64 in September 2011,
 20 where she has stagnated to the present.

21 83. Microsoft has and continues to pass her over for promotions in favor of less
 22 qualified and less experienced men.

23 84. As a result of Microsoft's compensation and promotion process, Ms. Piermarini
 24 has been paid less than comparable male coworkers in the same position.

25 85. Ms. Piermarini has observed that women progress more slowly and are treated less
 26 favorably at Microsoft.

27 86. In or around November 2014, Ms. Piermarini asked her manager where she stood
 28 in terms of the next level promotion. He told her that she needed to take on a "big project."

1 Although this criterion had not been communicated to her previously, nor had it been applied to
2 men who had been promoted in the past, Ms. Piermarini put together a proposal for her manager
3 on her role as lead of a large project. Although her manager initially expressed support for the
4 role, he refused to provide her any feedback on her proposal. Several months later, Ms.
5 Piermarini learned through a group email that her manager had assigned the lead role on the
6 project to a male member of the team who was a Level 64 at the time and who has since been
7 promoted to a Level 65.

8 87. Ms. Piermarini complained to Microsoft Human Resources that she believed her
9 manager was treating her less favorably because of her gender both in terms of work
10 opportunities and by making demeaning and sexist comments. For example, he dismissed the
11 fact that she had raised concerns with him about his poor treatment of her as compared to others
12 by claiming she had become emotional during the meeting. He also singled her out for her child-
13 care responsibilities although they had no impact on her performance, and male members of her
14 team were in comparable situations.

15 88. Microsoft Human Resources concluded their investigation into Ms. Piermarini's
16 complaints finding that her male manager had done nothing wrong. This same man remains Ms.
17 Piermarini's manager. Upon information and belief, after Ms. Piermarini complained to Human
18 Resources, her manager retaliated by soliciting negative and demonstrably false comments about
19 Ms. Piermarini for her 2015 end of the year performance evaluation. Ms. Piermarini also did not
20 receive a promotion in 2015 and, upon information and belief, was paid a smaller bonus amount
21 in comparison to men performing at or below her level.

CAUSES OF ACTION

FIRST CLAIM FOR RELIEF

Intentional Discrimination

Intentional Discrimination
(Title VII of the Civil Rights Act of 1964, 42 U.S.C. §§ 2000e *et seq.*, as amended by the Lilly Ledbetter Fair Pay Act of 2009)
(On Behalf of Plaintiffs and the Class)

27 89. Plaintiffs incorporate the preceding paragraphs as alleged above.

1 90. This claim is brought by Plaintiffs on behalf of themselves and the Class they seek
2 to represent. Plaintiff Moussouris has filed a timely charge with the EEOC on behalf of herself
3 and the Class Members. Plaintiffs Muenchow and Piermarini may piggy-back off the previous
4 filing of Moussouris, because Moussouris's EEOC charge relates to the same claims that
5 Muenchow and Piermarini assert.

6 91. Microsoft has engaged in an intentional, company-wide, and systematic
7 policy, pattern, and/or practice of discrimination against its female technical employees.
8 Microsoft has intentionally discriminated against Plaintiffs and the Class in violation of Title VII
9 by, among other things:

10 a. Utilizing a biased performance rating system;
11 b. Utilizing a biased compensation system;
12 c. Utilizing a biased promotion system; and
13 d. Failing to take reasonable and adequate steps to prevent and correct the use
14 of standardless, unvalidated, and/or illegitimate criteria to determine the terms and conditions of
15 employment.

16 92. These company-wide policies are intended to and do have the effect of:
17 a. Denying Plaintiffs and Class Members business opportunities because of
18 their gender;
19 b. Compensating them less because of their gender;
20 c. Failing to promote them because of their gender;
21 d. Evaluating their performance more negatively because of their gender; and
22 e. Providing them with inferior terms and conditions of employment as a
23 result of discriminatory performance measures that systematically disadvantaged them because of
24 their gender.

25 93. The discriminatory acts that constitute Microsoft's pattern and/or practice of
26 discrimination have occurred both within and outside the liability period in this case.

27
28

94. As a direct result of Microsoft's discriminatory policies and/or practices as described above, Plaintiffs and the Class have suffered damages including, but not limited to, lost past and future income, compensation, and benefits.

95. The foregoing conduct constitutes illegal, intentional discrimination and unjustified disparate treatment prohibited by 42 U.S.C. §§ 2000e *et seq.*

96. Plaintiffs request relief as hereinafter described.

SECOND CLAIM FOR RELIEF

Disparate Impact Discrimination

(Title VII of the Civil Rights Act of 1964, 42 U.S.C. §§ 2000e *et seq.*, as amended by the Lilly Ledbetter Fair Pay Act of 2009)
(On Behalf of Plaintiffs and the Class)

97. Plaintiffs incorporate the preceding paragraphs as alleged above.

98. This claim is brought by Plaintiffs on behalf of themselves and the Class they seek to represent. Plaintiff Moussouris has filed a timely charge with the EEOC on behalf of herself and the Class Members. Plaintiffs Muenchow and Piermarini may piggy-back off the previous filing of Moussouris, because Moussouris's EEOC charge relates to the same claims that Muenchow and Piermarini assert.

99. Microsoft's reliance on illegitimate and unvalidated systems and criteria to evaluate employee performance, set compensation, select individuals for promotion, and determine other terms and conditions of employment, have an adverse impact on female technical employees in violation of Title VII and are not, and cannot be, justified by business necessity. Even if such system and/or policies could be justified by business necessity, less discriminatory alternatives exist and would equally serve any alleged necessity.

100. Microsoft has maintained these discriminatory policies, patterns, and/or practices both within and outside the liability period in this case.

101. As a direct result of Microsoft's discriminatory policies and/or practices as described above, Plaintiffs and the Class have suffered damages including, but not limited to, lost past and future income, compensation, and benefits.

102. The foregoing policies, patterns, and/or practices have an unlawful disparate impact on women in violation of 42 U.S.C. §§ 2000e *et seq.*

103. Plaintiffs request relief as hereinafter described.

THIRD CLAIM FOR RELIEF

Intentional Discrimination

(Washington Law Against Discrimination, Rev. Code Wash. § 49.60.010, et seq.)
(On Behalf of Plaintiffs and the Class)

104. Plaintiffs incorporate the preceding paragraphs as alleged above.

105. This claim is brought by Plaintiffs on behalf of themselves and the Class they seek to represent.

106. Microsoft has engaged in an intentional, company-wide, and systematic policy, pattern, and/or practice of discrimination against its female technical employees. Microsoft has intentionally discriminated against Plaintiffs and the Class in violation of the Washington Law Against Discrimination by, among other things:

- a. Utilizing a biased performance rating system;
- b. Utilizing a biased compensation system;
- c. Utilizing a biased promotion system; and
- d. Failing to take reasonable and adequate steps to prevent and correct the use
s, unvalidated, and/or illegitimate criteria to determine the terms and conditions of

107. These company-wide policies are intended to and do have the effect of:

- a. Denying Plaintiffs and Class Members business opportunities because of their gender;
- b. Compensating them less because of their gender;
- c. Failing to promote them because of their gender;
- d. Evaluating their performance more negatively because of their gender; and
- e. Providing them with inferior terms and conditions of employment as a result of discriminatory performance measures that systematically disadvantaged them because of their gender.

108. The discriminatory acts that constitute Microsoft's pattern and/or practice of
discrimination have been based in and emanated from within the State of Washington, and have
occurred both within and outside the liability period in this case. The discriminatory policies,
patterns, and practices have had a discriminatory impact on the female employees of Microsoft
nationwide.

6 109. As a direct result of Microsoft's discriminatory policies and/or practices as
7 described above, Plaintiffs and the Class have suffered damages including, but not limited to, lost
8 past and future income, compensation, and benefits.

9 110. The foregoing conduct constitutes illegal, intentional discrimination and
10 unjustified disparate treatment prohibited by the Washington Law Against Discrimination, Rev.
11 Code Wash. § 49.60.010. *et seq.*

12 || 111. Plaintiffs request relief as hereinafter described.

FOURTH CLAIM FOR RELIEF

Disparate Impact Discrimination

(Washington Law Against Discrimination, Rev. Code Wash. § 49.60.010. et seq.)
(On Behalf of Plaintiffs and the Class)

16 112. Plaintiffs incorporate the preceding paragraphs as alleged above.

17 113. This claim is brought by Plaintiffs on behalf of themselves and the Class they seek
18 to represent.

19 114. Microsoft's reliance on illegitimate and unvalidated systems and criteria to
20 evaluate employee performance, set compensation, and select individuals for promotion, and
21 determine other terms and conditions of employment, have an adverse impact on female technical
22 employees in violation of the Washington Law Against Discrimination and are not, and cannot
23 be, justified by business necessity. Even if such systems and/or policies could be justified by
24 business necessity, less discriminatory alternatives exist and would equally serve any alleged
25 necessity.

26 115. Microsoft has maintained these discriminatory policies, patterns, and/or practices
27 arising in and/or emanating from within the State of Washington, both within and outside the

1 liability period in this case. The discriminatory policies, patterns, and practices have had a
2 discriminatory impact on the female employees of Microsoft nationwide.

3 116. As a direct result of Microsoft's discriminatory policies and/or practices as
4 described above, Plaintiffs and the Class have suffered damages including, but not limited to, lost
5 past and future income, compensation, and benefits.

6 117. The foregoing policies, patterns, and/or practices have an unlawful disparate
7 impact on women in violation of the Washington Law Against Discrimination, Rev. Code Wash.
8 § 49.60.010. *et seq.*

9 118. Plaintiffs request relief as hereinafter described.

FIFTH CLAIM FOR RELIEF

Retaliation

Recitation
(Title VII of the Civil Rights Act of 1964, 42 U.S.C. §§ 2000e *et seq.*)
(On Behalf of Plaintiffs Moussouris and Piermarini Individually)

13 119. Plaintiffs Moussouris and Piermarini incorporate the preceding paragraphs as
14 alleged above.

15 120. This claim is brought by Plaintiffs Moussouris and Piermarini individually.
16 Plaintiff Moussouris has timely filed a charge with the EEOC alleging individual and class
17 retaliation claims and has thus exhausted her administrative remedies. Plaintiff Piermarini may
18 piggy-back off the previous filing of Moussouris, because Moussouris's EEOC charge relates to
19 the same claims that Piermarini asserts.

20 121. Plaintiffs Moussouris and Piermarini engaged in protected activities, including
21 making internal complaints of unlawful discrimination and filing charges with the EEOC
22 complaining of Microsoft’s discriminatory policies and practices.

23 122. Microsoft took adverse actions against Plaintiffs Moussouris and Piermarini with
24 the purpose of retaliating against them because of their participation in protected activities, and
25 Plaintiffs Moussouris and Piermarini suffered damages as a result of that conduct.

26 123. Plaintiffs Moussouris and Piermarini request relief as hereinafter described.

SIXTH CLAIM FOR RELIEF

Retaliation

(Washington Law Against Discrimination, Rev. Code Wash. § 49.60.010, et seq.
(On Behalf of Plaintiff Moussouris Individually)

124. Plaintiff Moussouris incorporates the preceding paragraphs as alleged above.

125. This claim is brought by Plaintiff Moussouris individually.

126. Plaintiff Moussouris engaged in protected activities, including making internal complaints of unlawful discrimination and filing charges with the EEOC complaining of Microsoft's discriminatory policies and practices.

127. Microsoft took adverse actions against Plaintiff Moussouris with the purpose of retaliating against her because of her participation in protected activities during the liability period in the State of Washington, and Plaintiff Moussouris suffered damages in the State of Washington as a result of that conduct.

128. Plaintiff Moussouris requests relief as hereinafter described.

PRAYER FOR RELIEF

129. WHEREFORE, Plaintiffs and the Class pray for relief as follows:

a. Certification of the case as a class action on behalf of the proposed Class;

b. Designation of Representative Plaintiffs Moussouris, Muenchow, and

Piermarini as representatives of the Class;

c. Designation of Representative Plaintiffs' counsel of record as Class

Counsel for the Class;

d. A declaratory judgment that the practices complained of herein are

unlawful and violate 42 U.S.C. §§ 2000e, *et seq.*; and the Washington Law Against

Discrimination, Rev. Code Wash. § 49.60.010. *et seq.*;

e. A preliminary and permanent injunction against Microsoft and its officers, successors, employees, representatives, and any and all persons acting in concert with gaging in policies, patterns, and/or practices that discriminate against Plaintiffs or use of their gender or participation in this lawsuit;

f. An order that Microsoft institute and carry out policies, practices, and programs that provide equal employment opportunities for all employees regardless of gender, and that it eradicate the effects of their past and present unlawful employment practices;

g. An order requiring Microsoft to develop and institute accurate and validated standards for evaluating performance, determining pay, and making promotion decisions;

h. An order appointing a monitor to ensure that Microsoft complies with the injunction provisions of any decree that the Court orders;

- i. An order retaining jurisdiction over this action to ensure that Microsoft complies with such a decree;

j. An order restoring Plaintiff Moussouris and Class Members to their rightful positions at Microsoft (*i.e.*, reinstatement), or in lieu of reinstatements, an order for pay benefits;

k. Back pay (including interest and benefits) for the Representative Plaintiffs and Class Members;

1. All damages sustained as a result of Microsoft's conduct, including damages for emotional distress, humiliation, embarrassment, and anguish, according to proof;

- m. Exemplary and punitive damages in an amount commensurate with Microsoft's ability to pay and to deter future conduct;

n. Costs incurred herein, including reasonable attorneys' fees to the extent allowable by law;

o. Pre-judgment and post-judgment interest, as provided by law; and

p. Such other and further legal and equitable relief as this Court deems necessary, just, and proper.

JURY DEMAND

130. Pursuant to Rule 38(b) of the Federal Rules of Civil Procedure, Plaintiffs demand a trial by jury in this action.

1 Respectfully submitted,
